Ref : Query

Dear Sir,

Ref : Your query regarding Docmate with/without Imaging software

Sir, Thank you very much for your enquiry. We are glad to present to you the details of our **DOCMATE** software.

Sir, we are computer software consultants and makers of **DOCMATE** software program for computerising Clinical Practice. We developed this software in 1989 and since than we are selling, supporting the software and updating it with latest functions and features. The software is very user friendly and is time tested with excellent functions. This software helps in managing **all practice management functions**. It keeps patient records, history, visits, images, video images and helps in preparing prescriptions, receipts, daily collection and many other controlling reports. The **DOCMATE** program is available under **WINDOWS 95/98/NT** both under single and multiuser environments.

This program is suitable for all types of clinical practices. It is in use in **Gastro, Paediatrics, ENT, Eye, Ortho, GP, Medicine etc**. We are currently having more than 200 installations in Delhi and other states of India and abroad. Our program is well acclaimed and is the most popular clinical practice management software program. It is very user friendly and is supported by manuals and by on-line references.

Kindly find enclosed herewith, brochures for the above programs. Kindly let us also know, if we can help you in any other manner in this regard.

Yours truly,

Kamal Gupta
Director

Computer Requirements for Docmate

n Computer

Minimum Computer You require a computer of the following type

- o   PENTIUM   I 133 Mhz CPU
- o   32 MB RAM   or Higher
- o   1.44 MB Floppy Drive
- o   CD ROM
- o   1 x 1.2GB Hard Disk or Higher
- o   Colour Monitor
- o   One empty PCI slot for image grabbing card

Note : The above configuration is redundant in current context of computer availability. Nowadays computers are much powerful and are of much higher capacities. What we have suggested here is the least computer configuration that you should have. Any computer bigger then the above would do fine for running the software. In case if you plan to record video using Docmate than you should use following computer configuration for best results.

Best Computer   Look for system of following type to give best performance today.

- o   PENTIUM   IV 1.7Ghz CPU   or higher
- o   128 MB RAM   or Higher
- o   1.44 MB Floppy Drive
- o   CD ROM
- o   40 GB Hard Disk or Higher
- o   15" Colour Monitor
- o   One empty PCI slot for image grabbing card
- o   Sound card with Game port and speakers

n Printer

- o   Inkjet, deskjet printer with 720 dpi or more resolution . Low resolution inkjet printers will also work but may not print good quality images.

n Operating System

- o   Microsoft Windows 95, 98 , NT, 2000

n CVT or UPS

- o   Constant Voltage Transformer 500 VA or Uninterrupted Power Supply 500VA. Docmate software do not require this equipment, but is important to supply stabilized uninterrupted power to your computer. Utmost care should also be taken to provide proper earth to your equipment.

Busysoft Systems Pvt. Ltd. would supply you Docmate software. All the other computer equipments should be taken locally for better hardware support.

Busysoft The Company

Brief history

Founded in 1988
Incorporated in 1996
Main registered office in Delhi, India
MD Kamal Kant Gupta (MMS BITS PILANI -1985)
First Company to develop and sell Medical diagnostic management package (DOCMATE) in the field of health care industry.

More Information

Busysoft Systems was started by Mr. **Kamal Kant Gupta** in 1988 as a proprietor ship company acting as computer consultants and offering services in computerization of business activities of software development. The company provides services to small and medium scale organizations with a view that computers need not be a novelty. Small users should also be able to think of "Business Using Computers" to make best use of technology in the business world. That is why; company's services are user oriented and cost effective.

Since 1988 company has developed a series of low cost computerized software applications in common as well as business specific areas such as garment exporters, travel management, grain merchants, health care industry, educational institute management and control systems. Some of our best-known software applications are **Docmate**, **Docmate**, **Sono-Imager, Slide-Imager**, **Hospmate**, **Schoolmate**, **Rheosoft**, **Viscosoft**, **Export-Man**, **Travel-It**, **Weight-It** and **Aadati** (Grain merchant). Recently the company has launched **Sono-Imager**, an application for image processing and management for medical diagnostic centers.

In 1996 the company changed its status to private limited company. The company now enjoys a reputation of being leading software developer in the field of health care industry. Our aim is to make software as user friendly as possible. The motto of the company is "**We make software that works as per you**". To achieve the same we make software with which, each esteemed client should be able to work according to its own environment, critical business issues, location and preferences.

Our Approach

Using professional skills company develops low cost and effective software services. The services are customer oriented and are designed to ensure that computerized systems result in greater efficiency and cost effectiveness. This specific approach of the company for the conversion of customer's requirements into computerized systems just ensures the same.

Busysoft approach to software design and development is marked by an emphasis on custom installation and ability to deal with the details of functionality. Company's software expert believes in investing time and energy in understanding the user's need and environment. It is characterized by an illustrative use of contemporary concepts and innovative techniques with an emphasis on project modeling. System's approach involves phased development, starting from problem to implementation of the most feasible solution.

Company has sufficient technical and financial resources to meet the demands of the fast changing market. Its major strength lies in professionals controlling all of its activities.

Man

People are the most desired assets of any organization setup. They form the core of any resource base. We have over the years have evolved a team of professionals dedicated to the core segments of our activities. The team acts with fresh ideas, with an innovative approach to every problem. The team consists of professionals who have grown with us, through a variety of projects. The team now has more than 30 man-years of experience in the field.

Machine

Wide range of sophisticated man made objects reflects the dynamics of an organizational setup and the company has that. These form an important tool to enhance the process of development. With a network of Pentium servers, workstation and printers with a wide range of development software products the company have a strong base for taking reasonably sophisticated projects for computerization. The company is changing development tools from time to time to keep up with the technology.

Tools

Legacy tools: Complete PC based solutions using COBOL, Quick Basic, FoxPro under DOS
Current Tools: C++, Visual C, Visual Basic, Java with data base management under
MS-ACCESS, Oracle, MS-SQL.

Our Philosophy

At Busysoft we believe that a small team of dedicated professionals creates the worlds best software. Our goal is make the best and most featured software for the customers. We always try to provide most stable and user oriented software.

iT is for Health Care Industry
